

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

what if child safety gadget disconnects or theft?

Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

Shalinisnega

it affects the safety of the child and create the panic to parents

issue occuring in data doesn't reach to parents

when the child's geofence not works due to humidity,..

the issue will occur if the child gone over the geo fence or communication is not strong.

this can be overcome by forming Zig bee and connect the deices to zig bee.

issue occuring in location not marked or mismatched to safety location

it is important because for the child's safety

it is important because the message has to be sent to parents when child gone to danger area .

the issue is if the GPS data doesn't pushed to dashboard due to delay in satellite communication it creates big problem

the issue is when child crosses some safety location marked by parents ,it want to send message to parents ,if location not mapped correctly problem occurs

the boundaries of the problem is delay in communication.

the boundaries and the correct mapping to the location.

it affects the child's future.

the boundary of the problem is battery.

the issue is the parent doesn't know panic situation of child

Keerthiga

The device materials can vomit hazardous rays

The child's current activity cannot be notified

Parents have fear about the child

The health of the child to be considered

We concentrate on the gps and other communication devices in iot

The issue occuring in pointing the location of child

If the tracking is lost the childs place is unidentified. So,we focus on other way.

If the communication between child and parents where disconnected

The child's gps not work we can't identify the place of the child

The child location only tracked by gps

The issue was the location was not find

The rays causes health issues

Priyanka

does they get an incorrect information

may be the child informations are inerrupted

body temperature, pulse rate may be incorrect

Child's body temperature may affect pydevice temperature

To know the childrens location if they are missing

to know the health information of the child

to reduce interrupt to get correct information of the child

Keerthana

The performance will be difficult to maintain.

We can only view the last active location of the child.

The parents will be mentally affected and child will be lost.

When the database crashes.

To ensure that the child is safe & sound.

Data & information are not able to read/write.

When child is unsafe.

Surrounding around the child.

Where the place cannot recharge the device.

In order to get the information about child safety works smoothing & accurately.

## Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

### Based on location:

We can only view the last active location of the child.

To know the children's location if they are missing

issue occurring in location not marked or mismatched to safety location

the issue is if the GPS data doesn't push to dashboard due to delay in satellite communication it creates big problem

### based on safety

the issue is when child crosses some safety location marked by parents, it wants to send message to parents, if location not mapped correctly problem occurs

In order to get the information about child safety works smoothly & accurately.

it is important because the message has to be sent to parents when child goes to danger area.

### based on health

The device materials can vomit hazardous rays

Child's body temperature may affect by device temperature

Device heat may affect the child

to know the health information of the child

it affects the safety of the child and creates the panic to parents

the issue is the parent doesn't know the panic situation of child

If the communication between child and parents is disconnected

### based on communication

Data & information are not able to read/write.

### based on data

to reduce interrupt to get correct information of the child

When the database crashes.

We concentrate on the GPS and other communication devices in IoT

the issue will occur if the child goes over the geo fence or communication is not strong.

the boundaries of the problem is delay in communication.

the issue is if the GPS data doesn't push to dashboard due to delay in satellite communication it creates big problem

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
